

Wash Select II™ POS

- New! Site owners may charge for up to 3 additional services (wax, tire shine, etc.)
- New! Site owners may charge a customer's credit card for VIP Wash Pass purchases
- Multi-use codes provide the ability to sell a fleet account from the register or pumps
- Fleet accounts can now be added, edited or deleted through remote reporting
- Supports credit card processing through a dial-up or Internet connection
- Available with either a Coinco or Mars bill validator
- Also available for the Canadian market

The **Wash Select II™ POS** is the complete solution for numerous applications using the versatile Wash Select II entry system and the universal POS 4000/V2 management system. Petroleum/C-Store and self-serve carwash operators alike can benefit from this upgraded, heavy-duty premium entrance system with optional acceptance of major credit cards, tokens, \$1 coins, VIP Wash Pass™, VIP Wash Coupons™, and paging & remote reporting features.

The **POS 4000/V2** is a highly developed, integrated carwash marketing and accounting system. Interfacing with your cash register and gas pumps, it allows customers to purchase washes at the gas pump, in the C-Store and at the wash entrance. The POS 4000/V2 gives you additional selling capabilities and accounting controls that help to maximize your profits.

Using Unitec's **Wireless RF Communications** option, owners can benefit from increased revenues through the issuance of carwash codes at a remote location (visible by line of site). By connecting multiple POS devices via a radio frequency, users can take advantage of offsite sales opportunities (such as the gas station down the street) at a much lower cost than running hard cable, or where hard cable installations are not feasible.

POS 4000/V2
